Director/Sr Product Manager

Dele Health is on a mission to save lives through fall prevention, and prevent one million falls by 2024. Learn more at: https://delehealth.com/about/

We are seeking a highly experienced Product Manager to join our team. In this highly visible role you will drive the productization of fall-related technologies from detection to prevention - including gathering and negotiating requirements with multiple partners - packaging, positioning and pricing our technologies and services into products and ultimately refining and executing on our product roadmap.

As part of our leadership team, you'll be ready, willing and delighted to co-create with customers and work tirelessly to ensure that everyone involved has a fantastic experience. Applicants should have 5+ years experience as Product Manager in a startup, ISV/SaaS/Cloud environment, along with demonstrable planning, organizational, and communication skills. You should be comfortable (and skilled) at making decisions without enough data and bring a thoroughly entrepreneurial mindset to the problems our customers and partners face.

Ideal candidates will have a background in cloud-based healthcare services that use AI/machine learning plus work with IOT/sensor data and related standards (like MQTT) - and be able to speak to products and services they have launched in the past few years

Dele Health offers 100% remote work, excellent compensation and benefits, including matching 401k plan.If you're looking for the opportunity to bring the above data skills to a venture that is truly focused on making people's lives better, we'd love to hear from you!
