

## Principal/QA Engineer

Dele Health is on a mission to save lives through fall prevention, and prevent one million falls by 2024. Learn more at: <https://delehealth.com/about/>

We are seeking experienced QA engineers to test and verify our evolving data fusion platform and partner integrations. In this role you will validate integrations with all kinds of sensors and data sources, verify and automate testing of platform and self-service portal changes, and report on quality and technical debt.

Candidates should have 5+ years in a SaaS/Cloud environment, working hands on with testing tools like Postman, Wireshark, and hands-on skill with python or javascript. Experience with GCP, AWS or Azure is a must, along with experience with Node.js & MongoDB, excellent written and verbal communication skills, ability to pick up new tech quickly.

Ideal candidates will have a background working with message systems like Kafka, handling PHI data, working with notification systems - plus the proven ability to self-motivate.

We offer 100% remote work, excellent compensation and benefits including 401k plan. If you're looking for the opportunity to bring the above technical skills to a venture that is truly focused on making people's lives better -- we'd love to hear from you!
