

Sr/Field Service Engineer

Dele Health is on a mission to save lives through fall prevention, and prevent one million falls by 2024. Learn more at: <https://delehealth.com/about/>

We are seeking an experienced Field Services Engineer to join our team. In this role you will oversee evaluation, integration and rapid deployment of sensor systems, including mmwave and other emerging devices, from wearables to built-ins.

Candidates should have 5+ years working hands-on installing, configuring and managing IOT/sensor systems, including required electrical work, ideally in a startup environment in healthcare, medical devices or telecom industries.

You'll need to bring an entrepreneurial mindset, along with strong verbal and written communications skills plus hands-on experience with APIs and tools like Postman. Up to 50% travel in the US may be required

Ideal candidates will have a background working with movement sensors in healthcare, and work on or with edge computing systems.

We offer 100% remote work, excellent compensation and benefits including 401k plan. If you're looking for the opportunity to bring the above technical skills to a venture that is truly focused on making people's lives better -- we'd love to hear from you!
