

Technical Program Manager

Dele Health is on a mission to save lives through fall prevention, and prevent one million falls by 2024. Learn more at: <https://delehealth.com/about/>

We are seeking an experienced Technical Program Manager to join our team. In this role you will coordinate development efforts for multiple Dele products, including partner integrations, our self-service portal, analytics/reporting and new AI services.

Candidates must have 2+ years experience working in an ISV/cloud/SaaS startup environment capturing product data and new feature demand, refining, ticketing and prioritizing work with the head of development, and driving efforts to completion. You'll need to bring an entrepreneurial, startup mindset, along with strong verbal and written communications skills plus hands-on experience with Jira, Confluence, APIs and tools like Postman, analytic tools like Elastic and/or PowerBI.

Ideal candidates will have a background working with developers, designers, operations and customer success teams, plus exposure to sensor/movement data in a healthcare environment and experience developing AI/ML applications. Hardware/IOT experience is also a plus.

We offer 100% remote work, excellent compensation and benefits including 401k plan. If you're looking for the opportunity to bring the above technical skills to a venture that is truly focused on making people's lives better -- we'd love to hear from you!
